...the smell of real wood, this true sense of
coming home or the distinctive colors of nature?

mafi natural wood floors are 100 % made in Austria, more by hand than by machine,
offering real, honest stability for natural, healthy living.

Stable

KEY FACTS

- both the top and bottom layers are made from the same wood and are given the same thermal treatment
- the middle layer is made of spruce cross-laminated at 90°
- formaldehyde-free white glue used

THE BENEFITS

- very high stability
- greatly reduced risk of joints coming apart
- ideal for laying on radiant heating
- broad range of applications
- impressive sizes: boards up to 5 meters/16.4 feet long and 300 mm/11.8 inches wide available
- natural resources optimally utilized

Feel the stability you seek in life right
under your feet.

The floor forms the foundation for every room. What covers it determines its durability, appearance and resilience. And that's why mafi and its natural wood floors are known for their stability, whether it's because we're a family business in Austria, our products, or the fact that we have staked our reputation on their quality.

Natural

KEY FACTS

- air-dried natural oils
- no surface film
- open-pored surface

THE BENEFITS

- direct contact with wood and therefore always warm to the body
- completely ecological
- formaldehyde-free
- extremely long product life cycle
- spot repairs possible
- very wide range of natural colors available
- regulates the room climate

Living with real hardwood,
preferably barefoot.

Wood in its uncompromised form interacts with all human senses. This is the only way that this natural material can unleash its healthy and pleasant properties for us humans. mafi natural wood floors are not just about the look, but also make the floor as a whole noticeable.

responsible forestry

mafi is FSC® certified. Products
with FSC® certification are
available on request.

Healthy

KEY FACTS

- finished with natural oils
- the three solid wood layers are bonded with white glue
- time factor as a quality criteria

THE BENEFITS

- improvement and filtration of indoor air
- formaldehyde-free
- no VOCs
- ideal for people with allergies and asthma
- optimum hygiene

More than a floor,
a healthy home.

Headaches, burning eyes, allergies... we spend about 90% of the day in enclosed spaces. That's why it's all the more important to pay attention to the origin and ingredients of the materials used in our spaces. mafi natural wood floors consist of wood, pollutant-free glue, and natural oils. In addition, our natural wood floors permanently improve your room climate.
