INSPIRATION FOR YOUR PROJECT

In the private sector, the trend is clearly in using a single floor covering for an entire project. This consistent basis opens up new design options, but at the same time places new demands on quality, functionality, and, of course, comfort. mafi natural wood floors are flexible enough to be used in wellness areas, children's rooms, and open-plan kitchens.

In the public sector, mafi floors are mostly used in hotels, restaurants, medical practices but also frequently in offices. Wood affects all of our senses, relaxes, and promotes a sense of well-being. Thanks to mafi's unique and unadulterated surfaces, mafi natural wood floors improve the indoor climate, clean the air, and reduce static electricity coming from electrical devices.

Private, Austria
OAK Country brushed white oil [ECEBBKW]
Architect: found' gmbh - Thomas Brunauer | Photo: Mathias Lixl

FINDING TRUE REST AT HOME

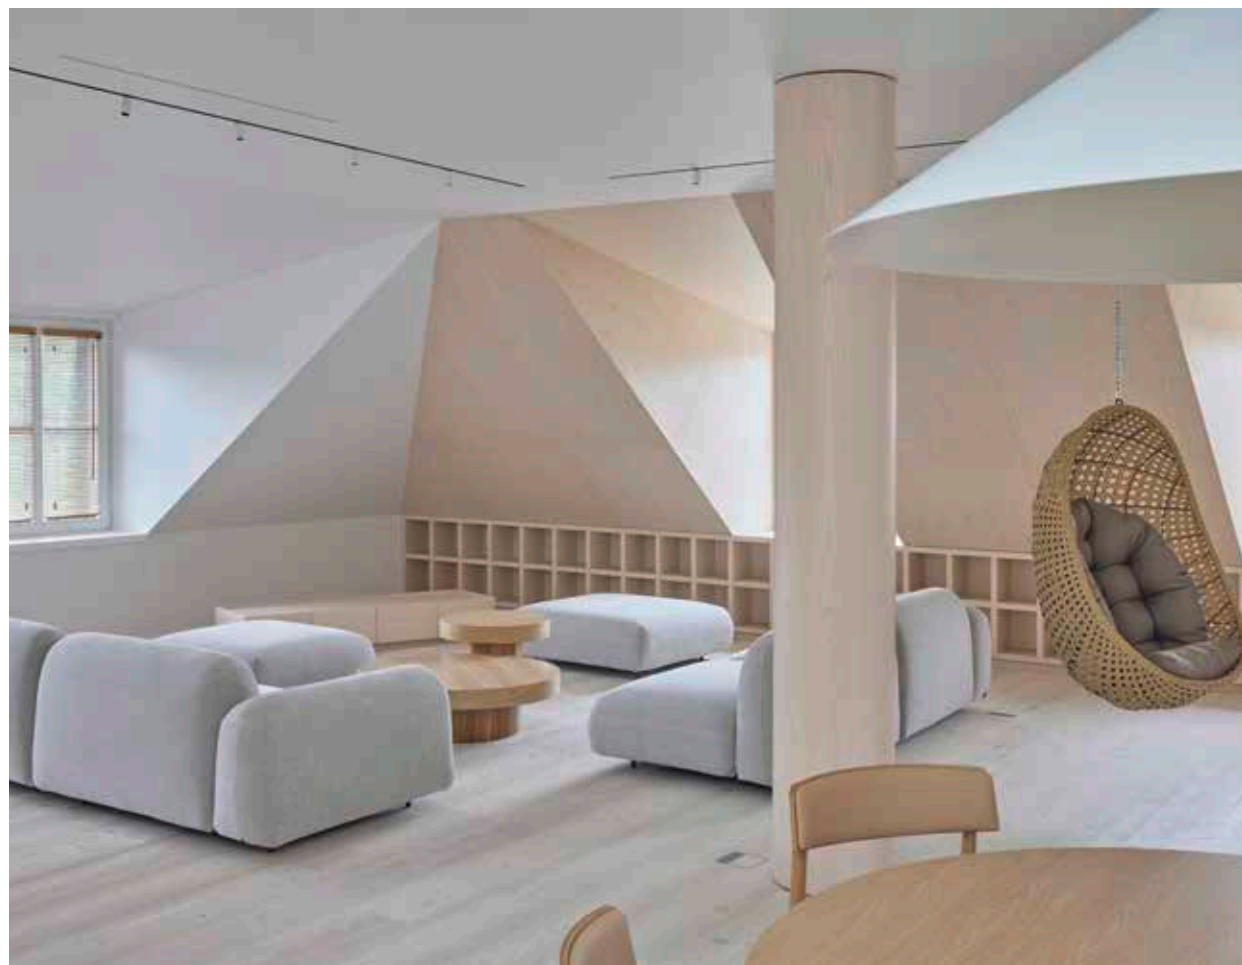

- Open-pored wood has a relaxing effect on humans and animals alike.
- Our unadulterated, brushed surface simply feels good, especially when barefoot.
- Real wood floors guarantee a feel-good atmosphere, whatever the furnishing style.

WOOD FLOORS FOR THE HEART OF THE HOME

- Broad portfolio of resilient wood species for heavy use.
- Easy to clean and prevent staining in a single step.
- Our natural wood floors can be repaired and do not necessarily have to be replaced.

DETAILS THAT MAKE THE DIFFERENCE

- Set accents by repeating materials, with matching wall cladding or suspended wooden ceiling elements.
- Parts of the living area, such as table tops or stairs, from a single source and matched to your wooden floor.

Private, Austria
UNI ASH brushed grey oil [WEEBBKG]
Architect: Groener Architekt ZT Jurgen Groener, Msc | Photo: Toni Schade

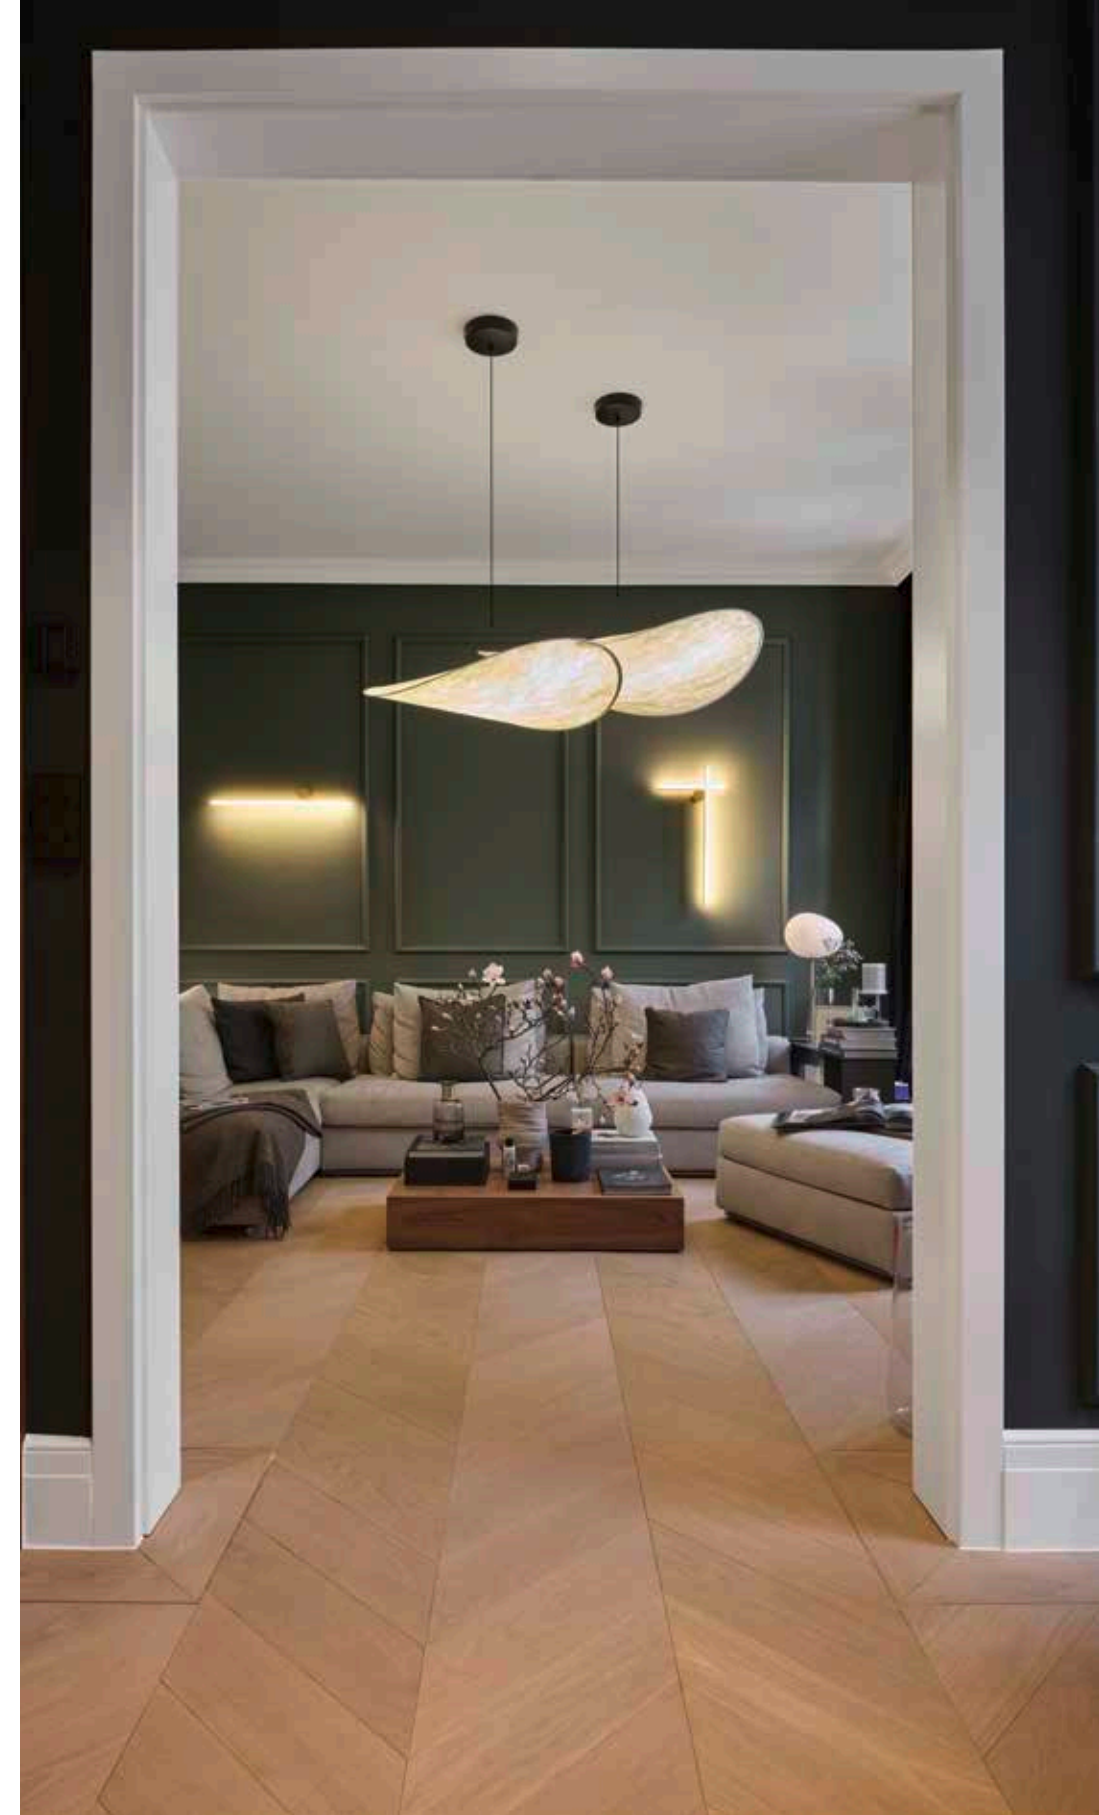

REPRESENTATIVE ROOMS

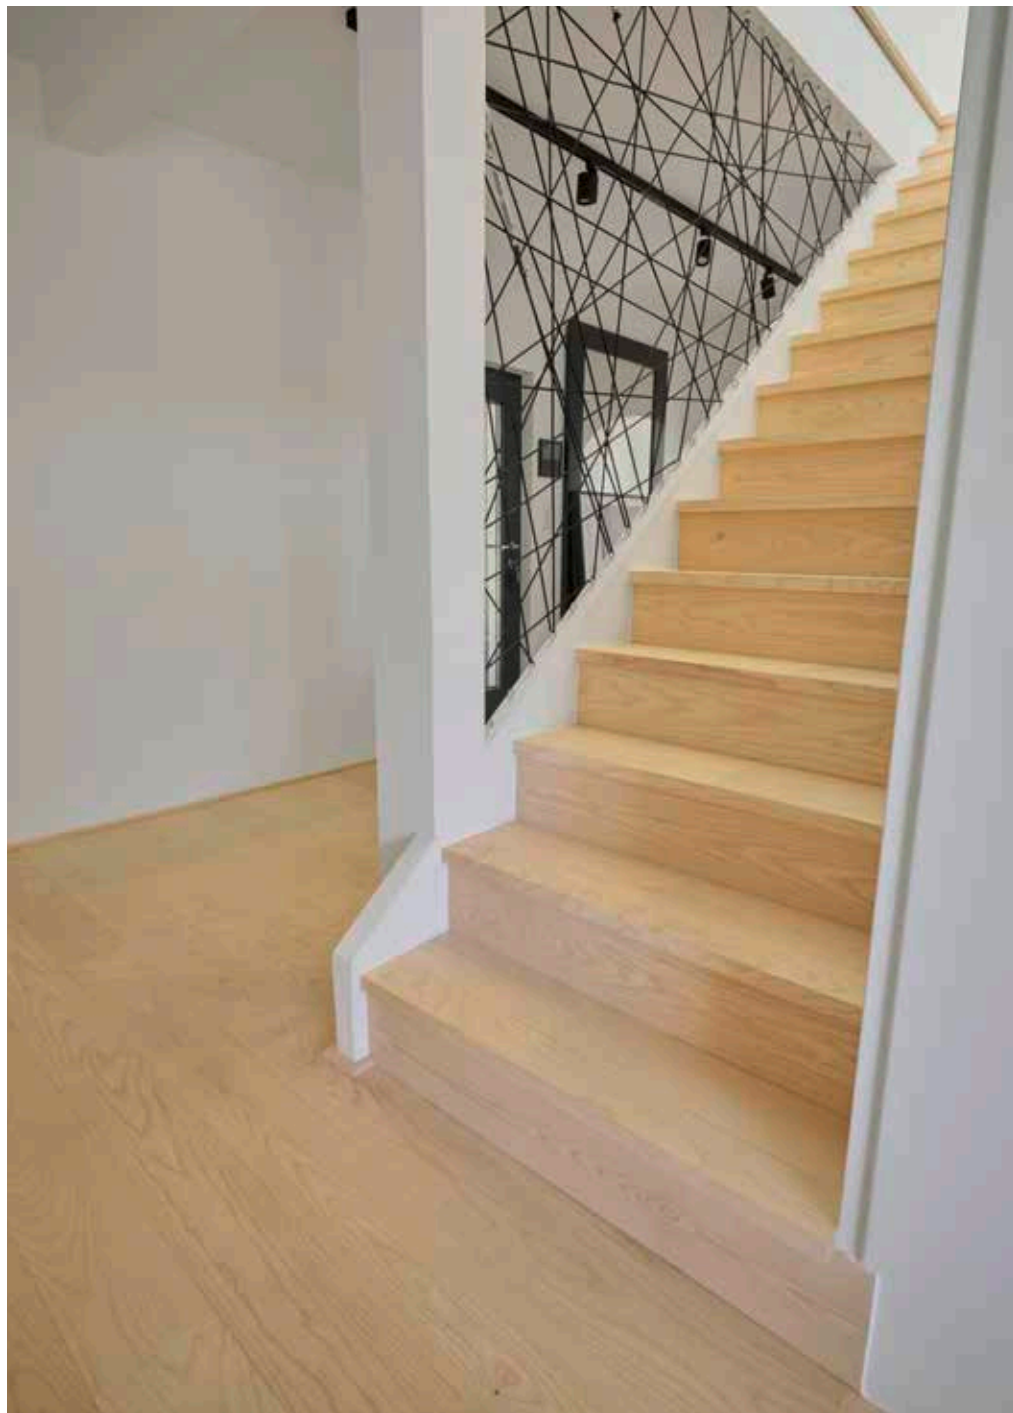

- Large selection of different formats, such as room-length planks or large-format chevron planks.
- High-quality wood floors form a timeless basis for interior designs even if the trends shift over time.

GATHERING SPACE AND SOCIAL CENTER

- No other material than unadulterated wood creates such a unique, pleasant atmosphere where people like to meet and linger.
- Open living/dining areas especially benefit from the versatility and resilience of mafi natural wood floors.

Private, Estonia

COOKING: WORK AND PLEASURE

- Standing for long periods is much easier on mafi natural wood floors than on tiles or stone. The reason for this is the softwood middle layer as well as the wood itself.
- Our air-dried oil finish allows people to come into direct contact with the wood, ensuring a surface that is always warm to the touch.

COOK AND EAT WITHOUT ANY RISK

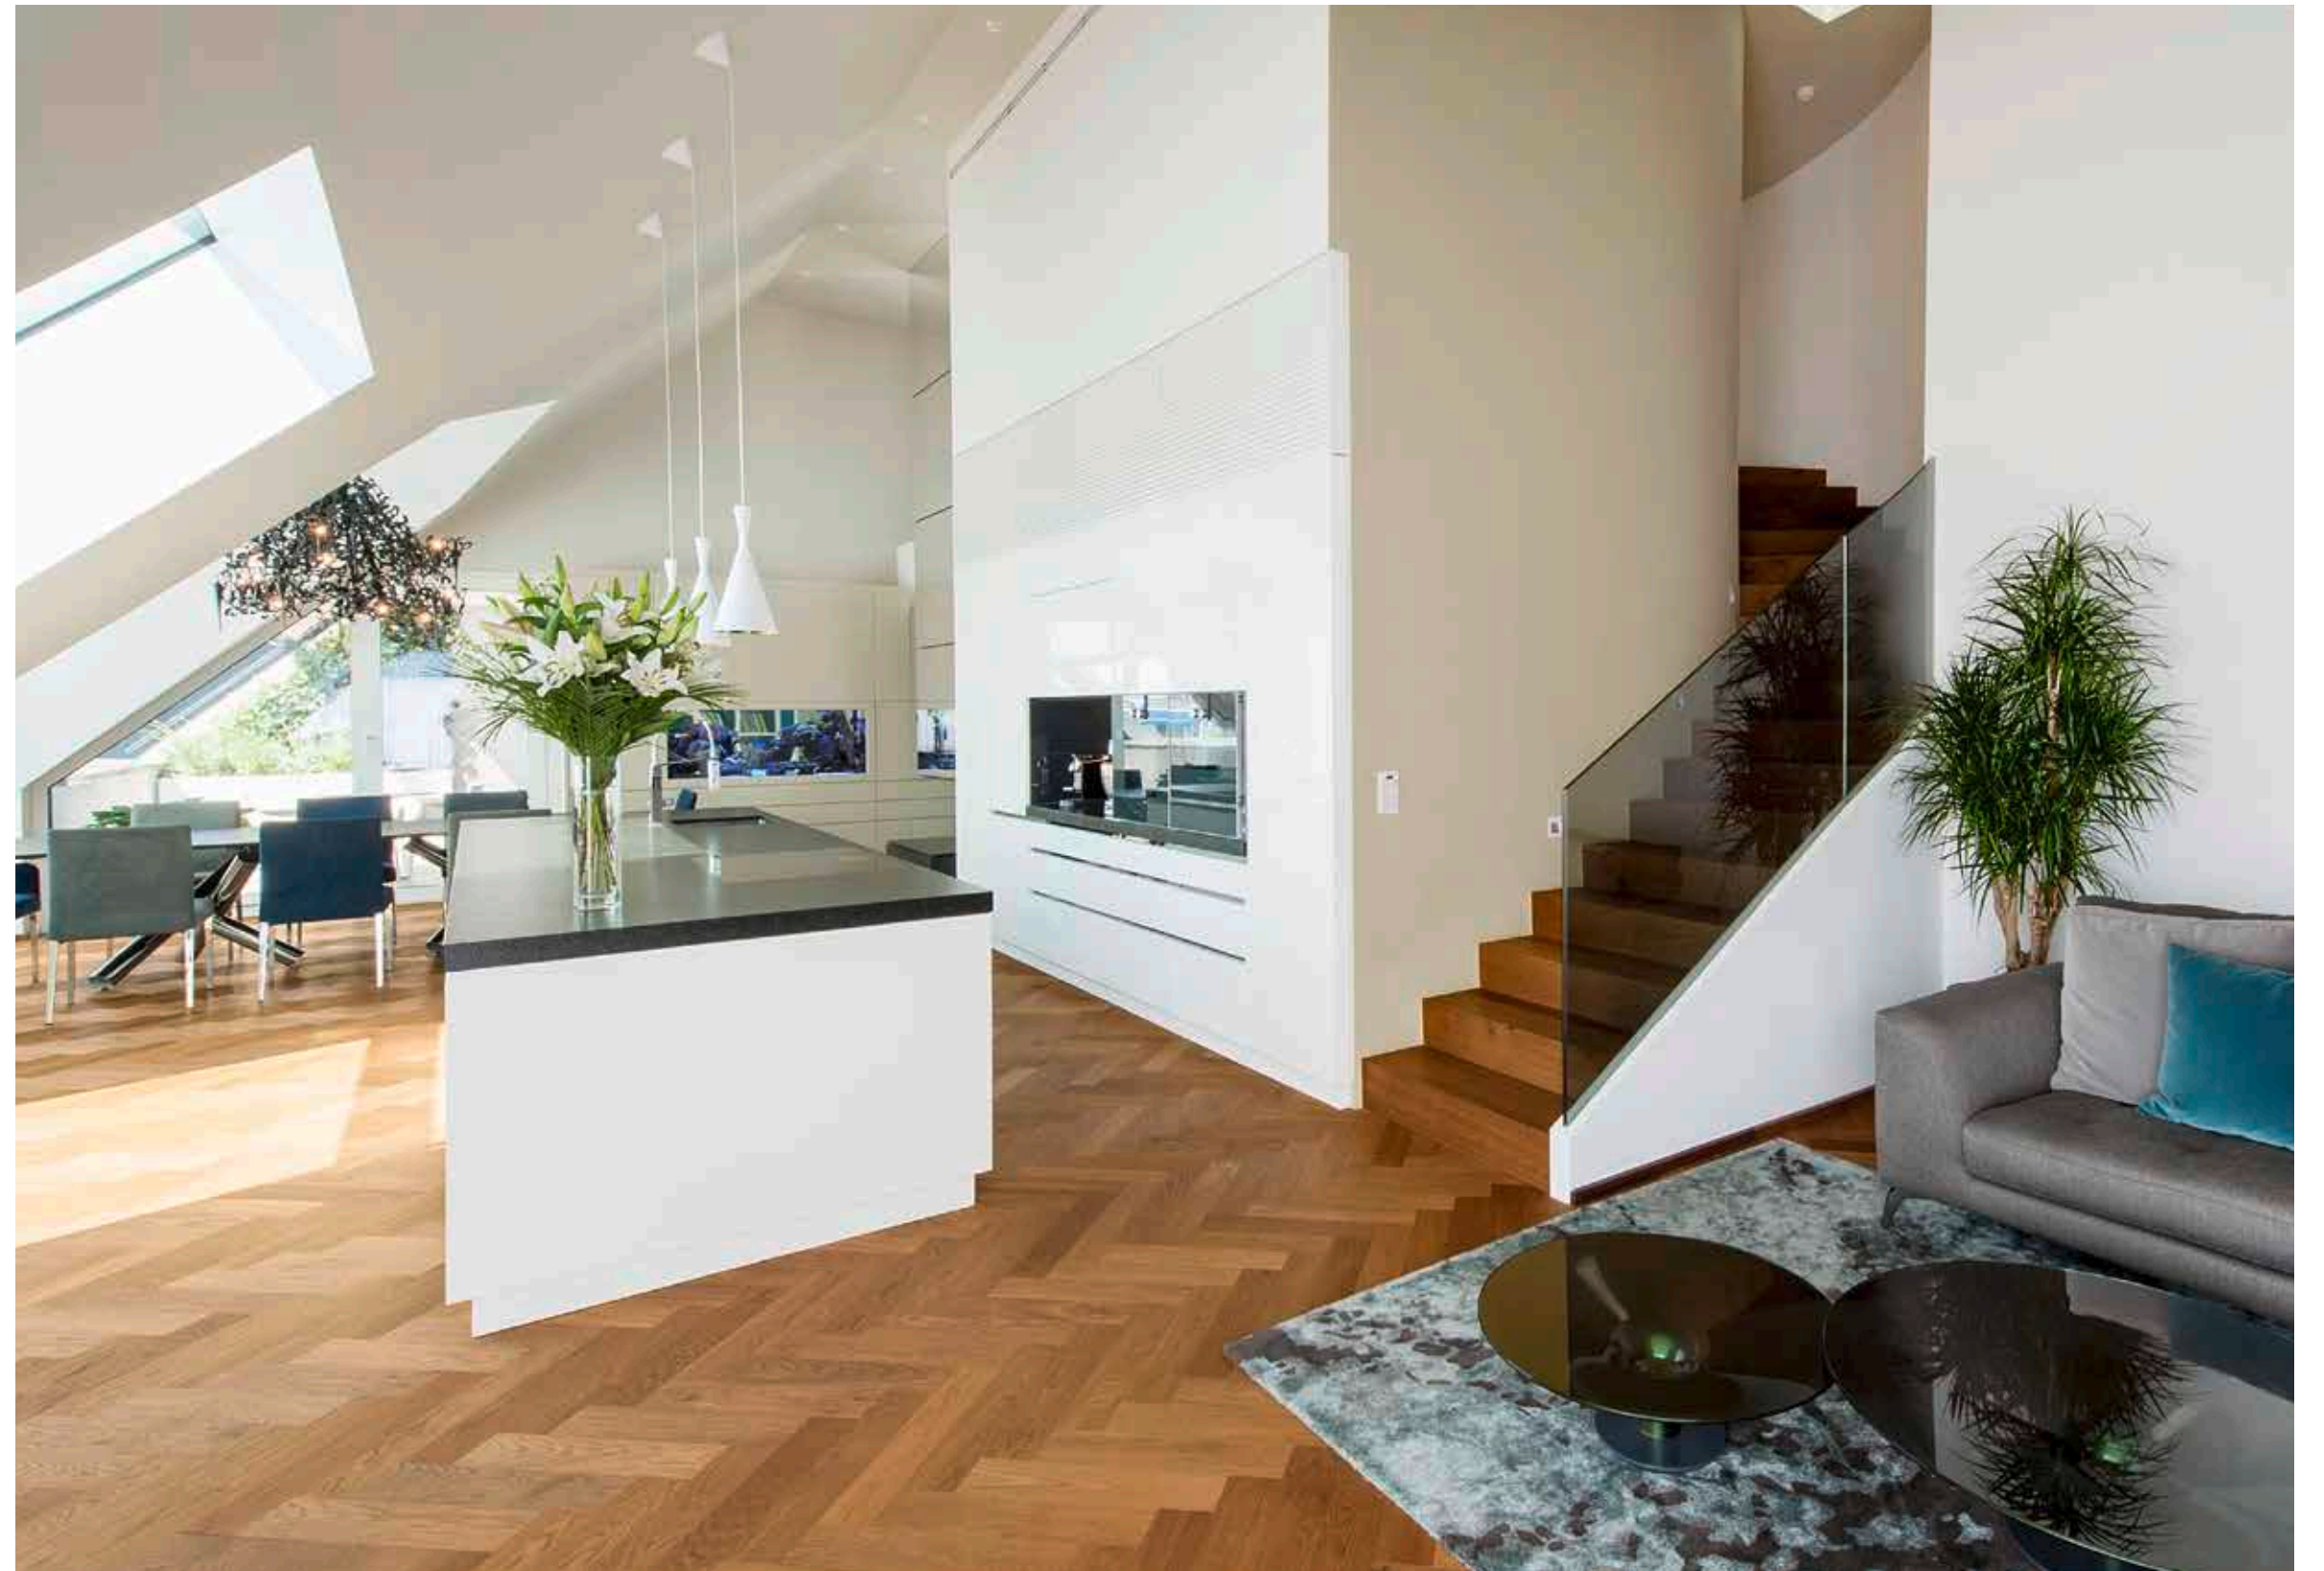

- Achieve both, cleaning and floor care in one simple step.
- Whether it's a splash of red wine or hot fat, household remedies or special stain removers, mafi surfaces can be quickly and easily cleaned directly on the spot.
- Get in touch with our service team if you need any assistance.

YOUR KITCHEN AS A STATEMENT

- A timeless natural wood floor creates the perfect basis for your kitchen design, whether you opt for contrasts or a holistic color concept.
- Repetitions of materials in your table tops, cabinet doors, and backsplash matched to your wood floors will create a harmonious interior design.

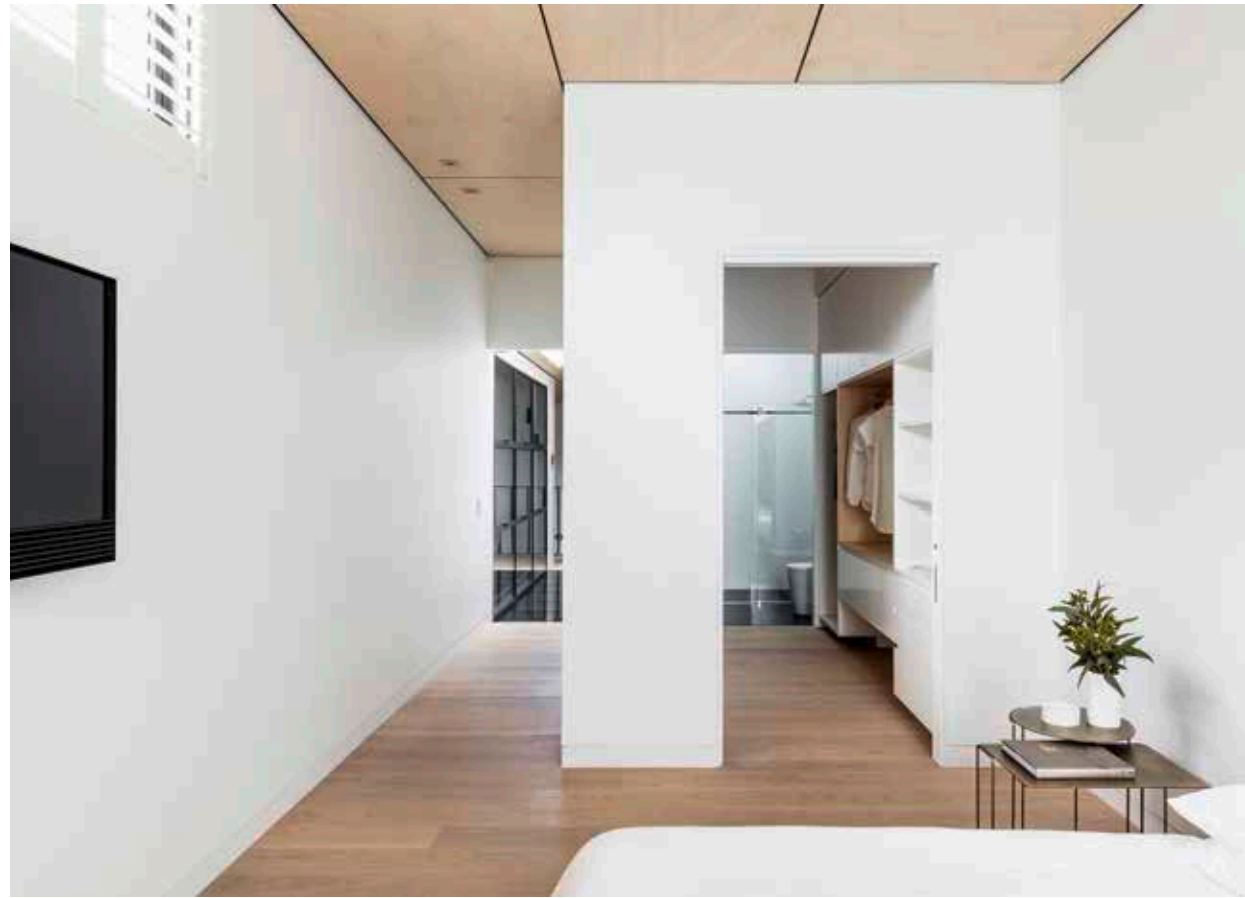

NATURAL HAVEN OF PEACE

Sleeping

Private, Romania

HEALTHY MATERIALS FOR HEALTHY SLEEP

- Selecting the appropriate materials is essential, given that the bedroom is where we primarily reside within our homes.
- Your bedroom floors are the first thing you feel when you get up in the morning. With us, you get to feel real wood, unadulterated and honest.

REGENERATION THROUGH REAL WOOD

- Maintaining balanced humidity levels and experiencing the subtle scent of wood after cleaning can induce a sense of relaxation, facilitating an easier transition into sleep.
- Wood harmonizes with people. Stone pine, for example, has a direct effect on our heartbeat and saves the heart an entire hour's work for every eight hours you sleep (source: Joanneum University).

Private, Mexico
OAK Clear brushed white oil [EAEBBKW]
Architect: Federico Gomez Crespo | Photo: Ileana Avila

THE INDOOR AIR FACTOR

- The open-pored surface of the wood cleans the room air and thus sustainably improves the quality of your sleep.
- mafi natural wood floors are without diffusion barrier and automatically regulate the humidity in the room.

DUAL FUNCTION: SLEEPING AND LIVING

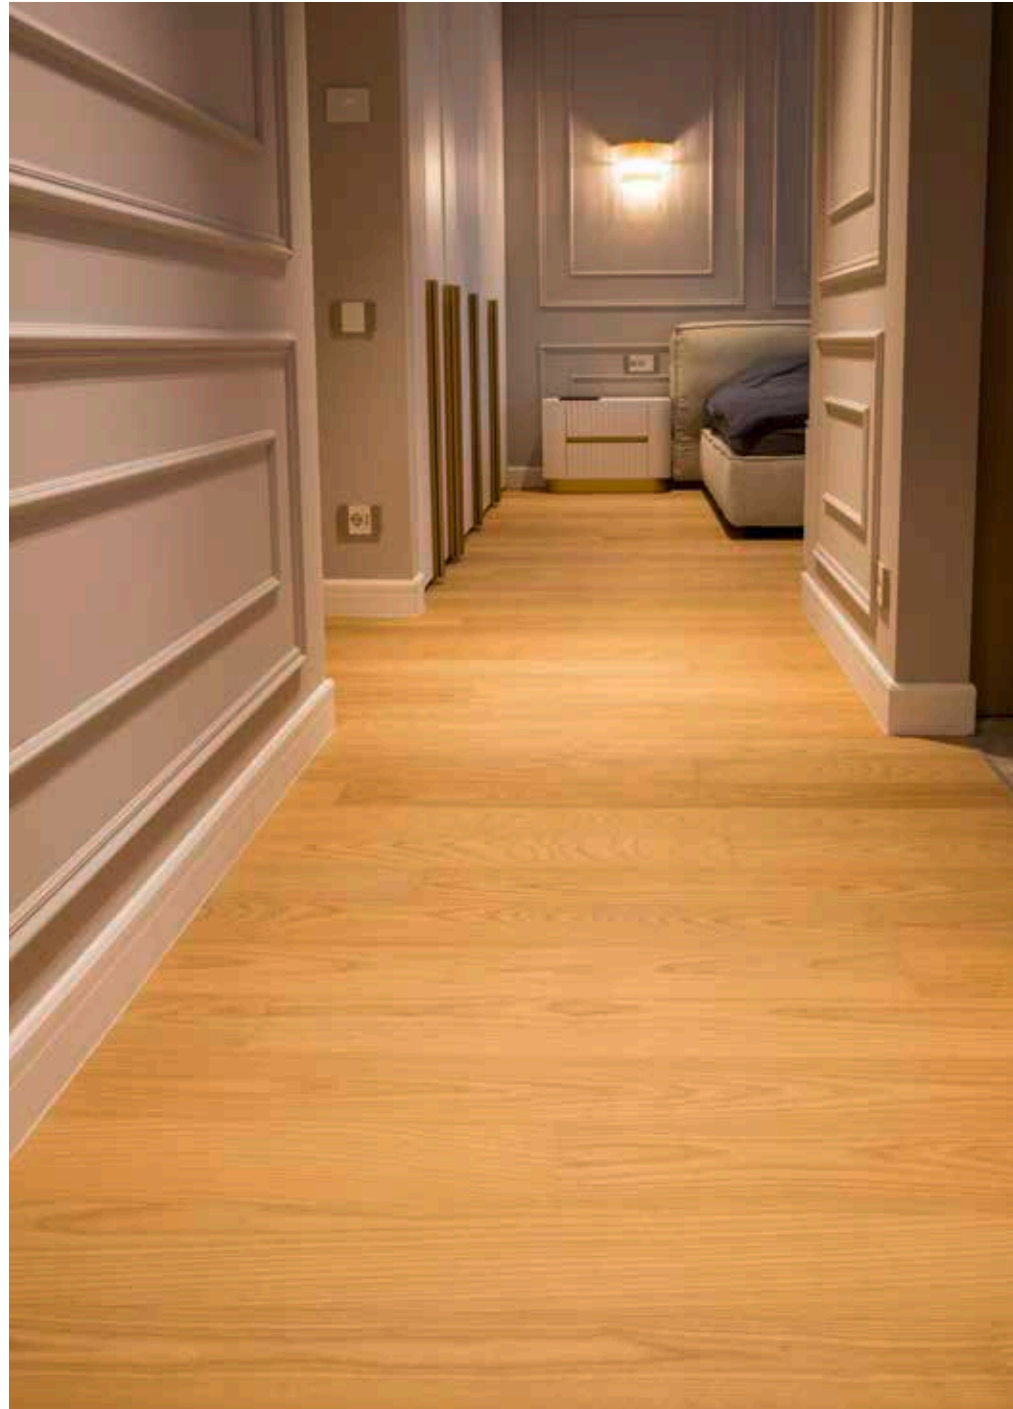

- When outfitting your child's room, it's crucial to prioritize avoiding toxins and opting for natural materials.
- Thanks to the oiled and non-film-forming surface, our floors can be locally repaired or even regenerate small signs of wear and tear by themselves.

RETHINKING A CLASSIC ROOM

- mafi's unique surfaces make it possible to use the same floor covering throughout your entire home, including the bathroom.
- A wood floor will give your bathroom a completely new character: no more cold tiles but a home oasis.

 Private, Austria
OAK Country Riva Mezzo brushed natural oil [R002BKN]
Photo: Mathias Lixl

WOOD AS AN EXPERIENCE

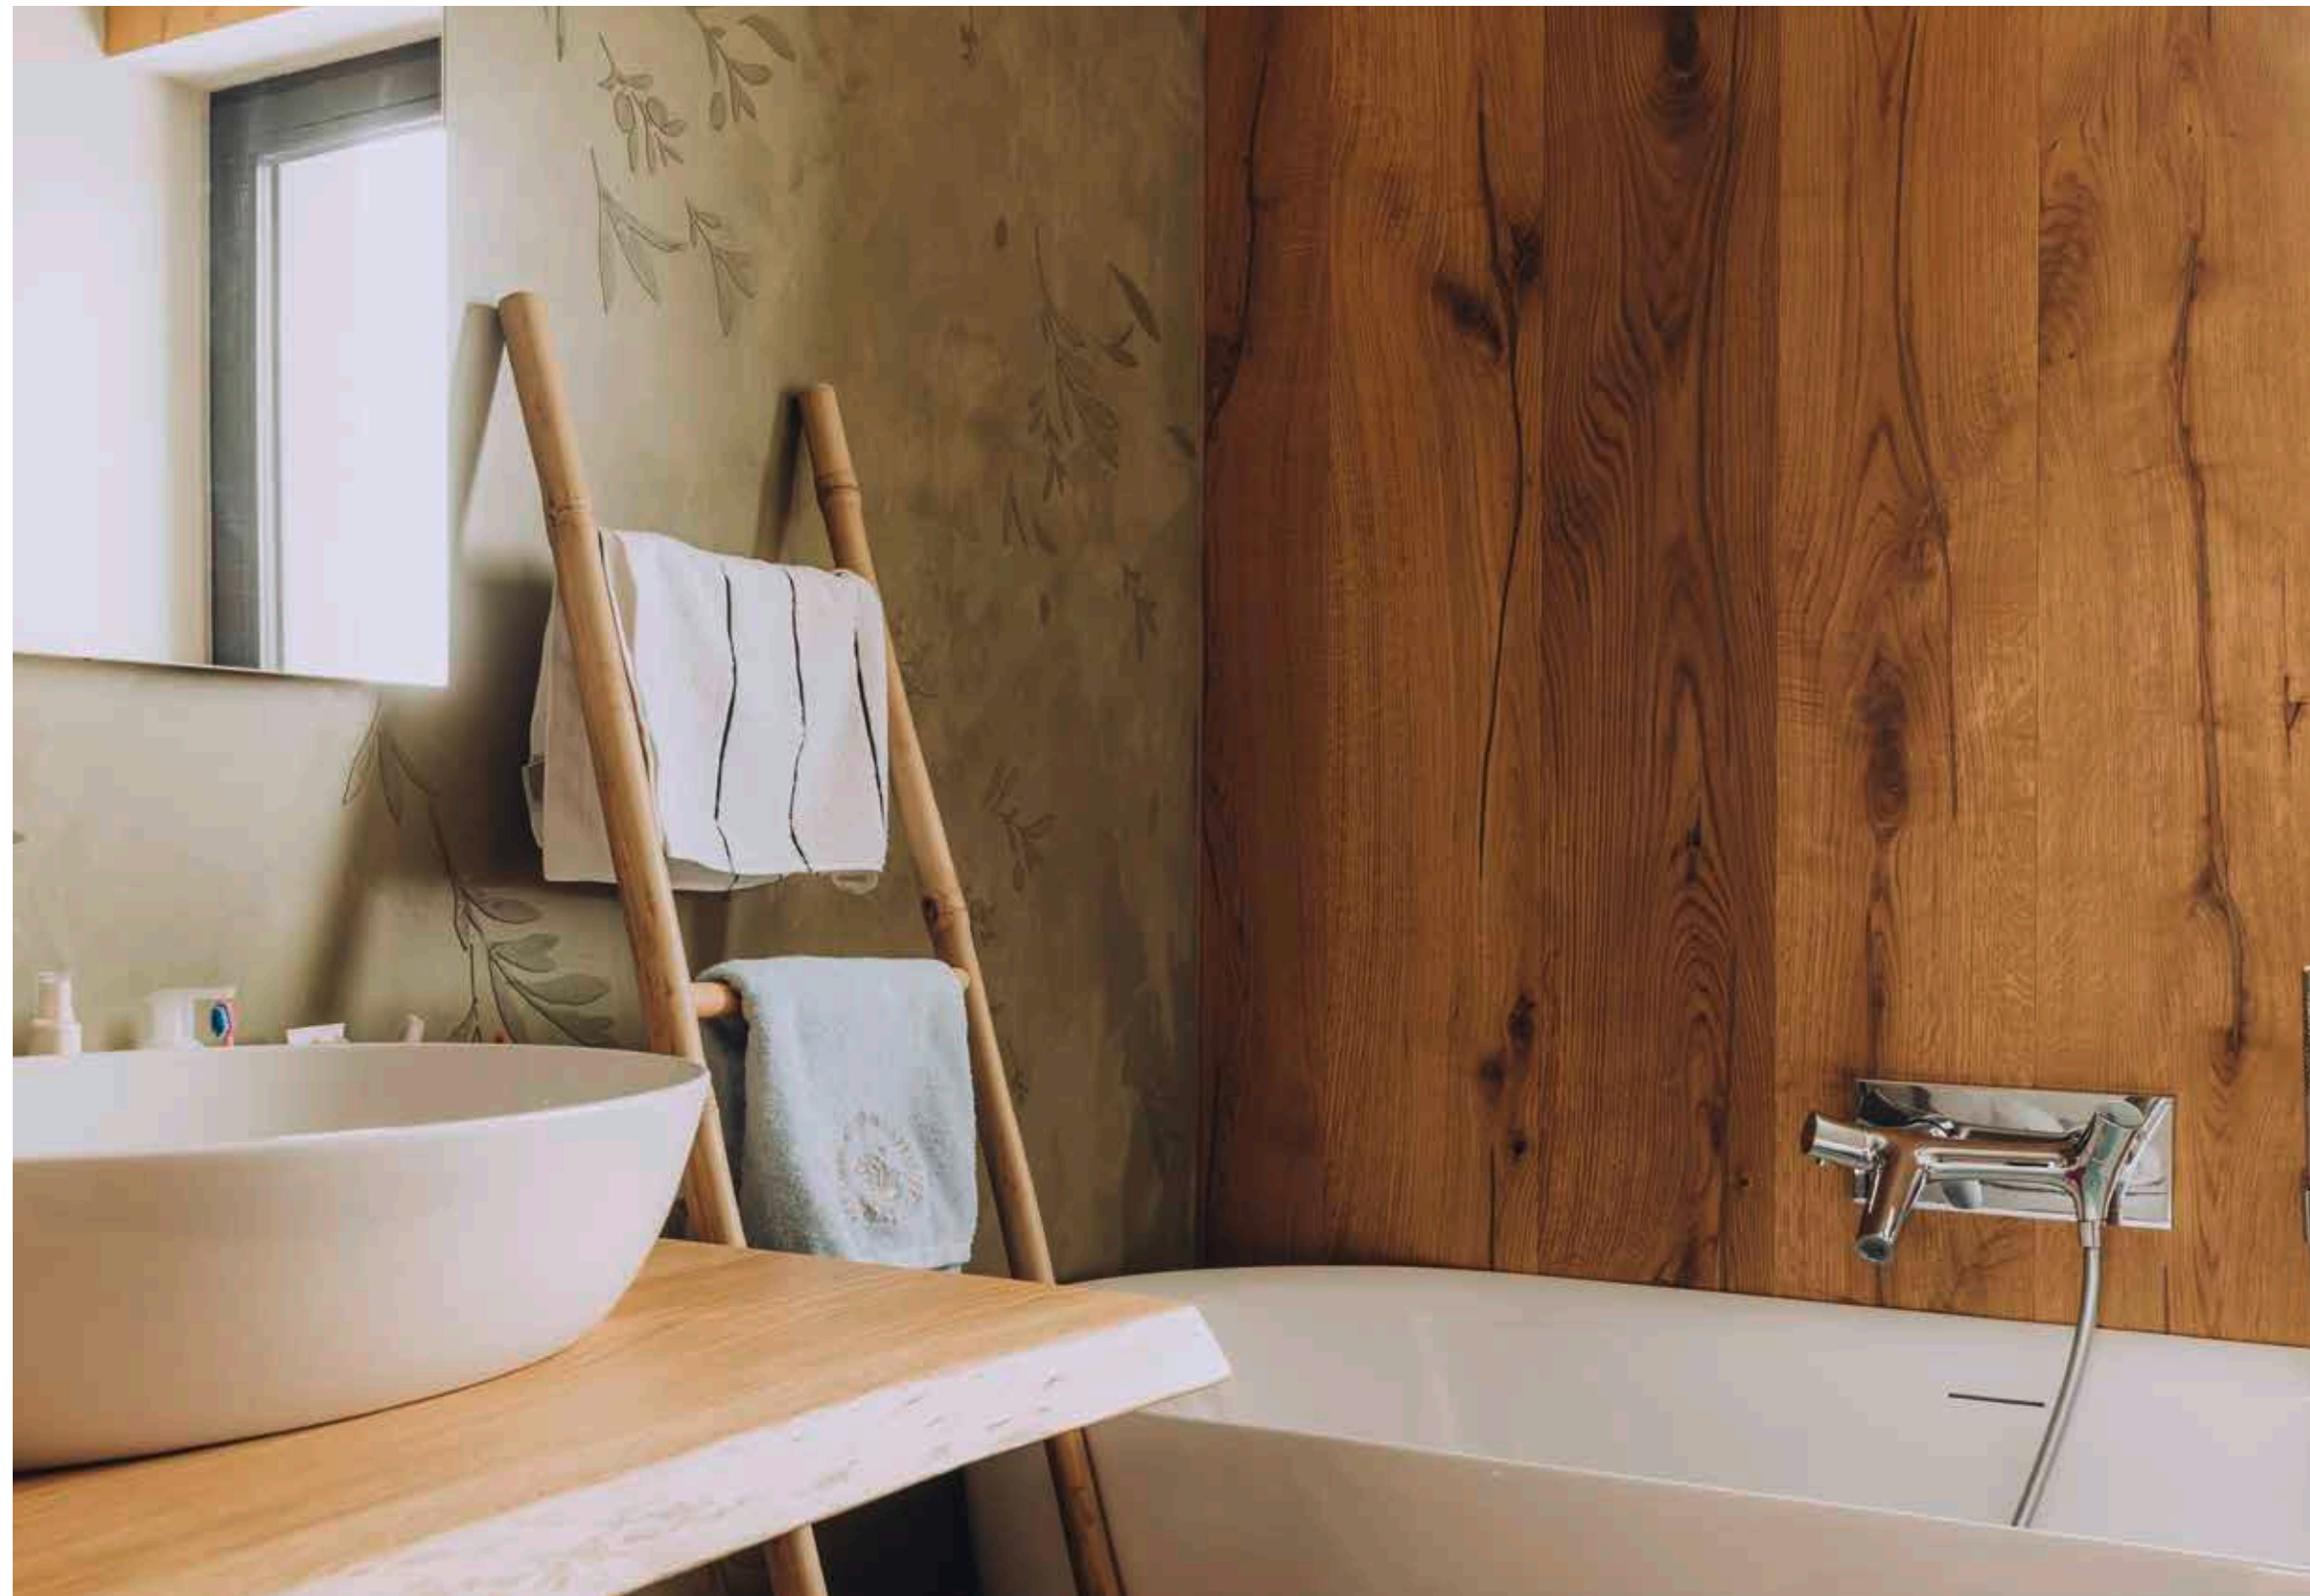

- With mafi natural wood floors, you directly stand on the wood and not on an unnatural layer of wax or lacquer: this feeling makes the difference.
- The wood always feels warm to the body and thanks to the gentle brushing it is also a tactile experience.
- Our special 3-D wood floors are real eye-catchers that massage your feet at the same time, whether at home or in the hotel spa.

WATER, WOOD, AND CLEANING

- The open-pored surface of our natural wood floors allows moisture to be absorbed and released into the room air. This makes the floor more resistant to water.
- Cleaning the floor is as easy as washing your hands: just use soap and warm water.

HEALTHY LIVING AS A UNIQUE SELLING POINT

- Guests are looking for variety, rest and regeneration: using the right materials in your interior design highlights your hotel's efforts.
- mafi natural wood floors have outstanding healthy properties such as stress reduction and air purification while not containing harmful substances.

EASY CLEANING AND LOCAL REPAIR

- Fast, hygienic, and natural: mafi natural wood floors are cleaned with warm water and wood floor soap.
- Damaged spots can be repaired partially without having to rework the entire surface. This means repairs can be carried out quickly and without disrupting hotel operations.

DETAILS THAT MATTER

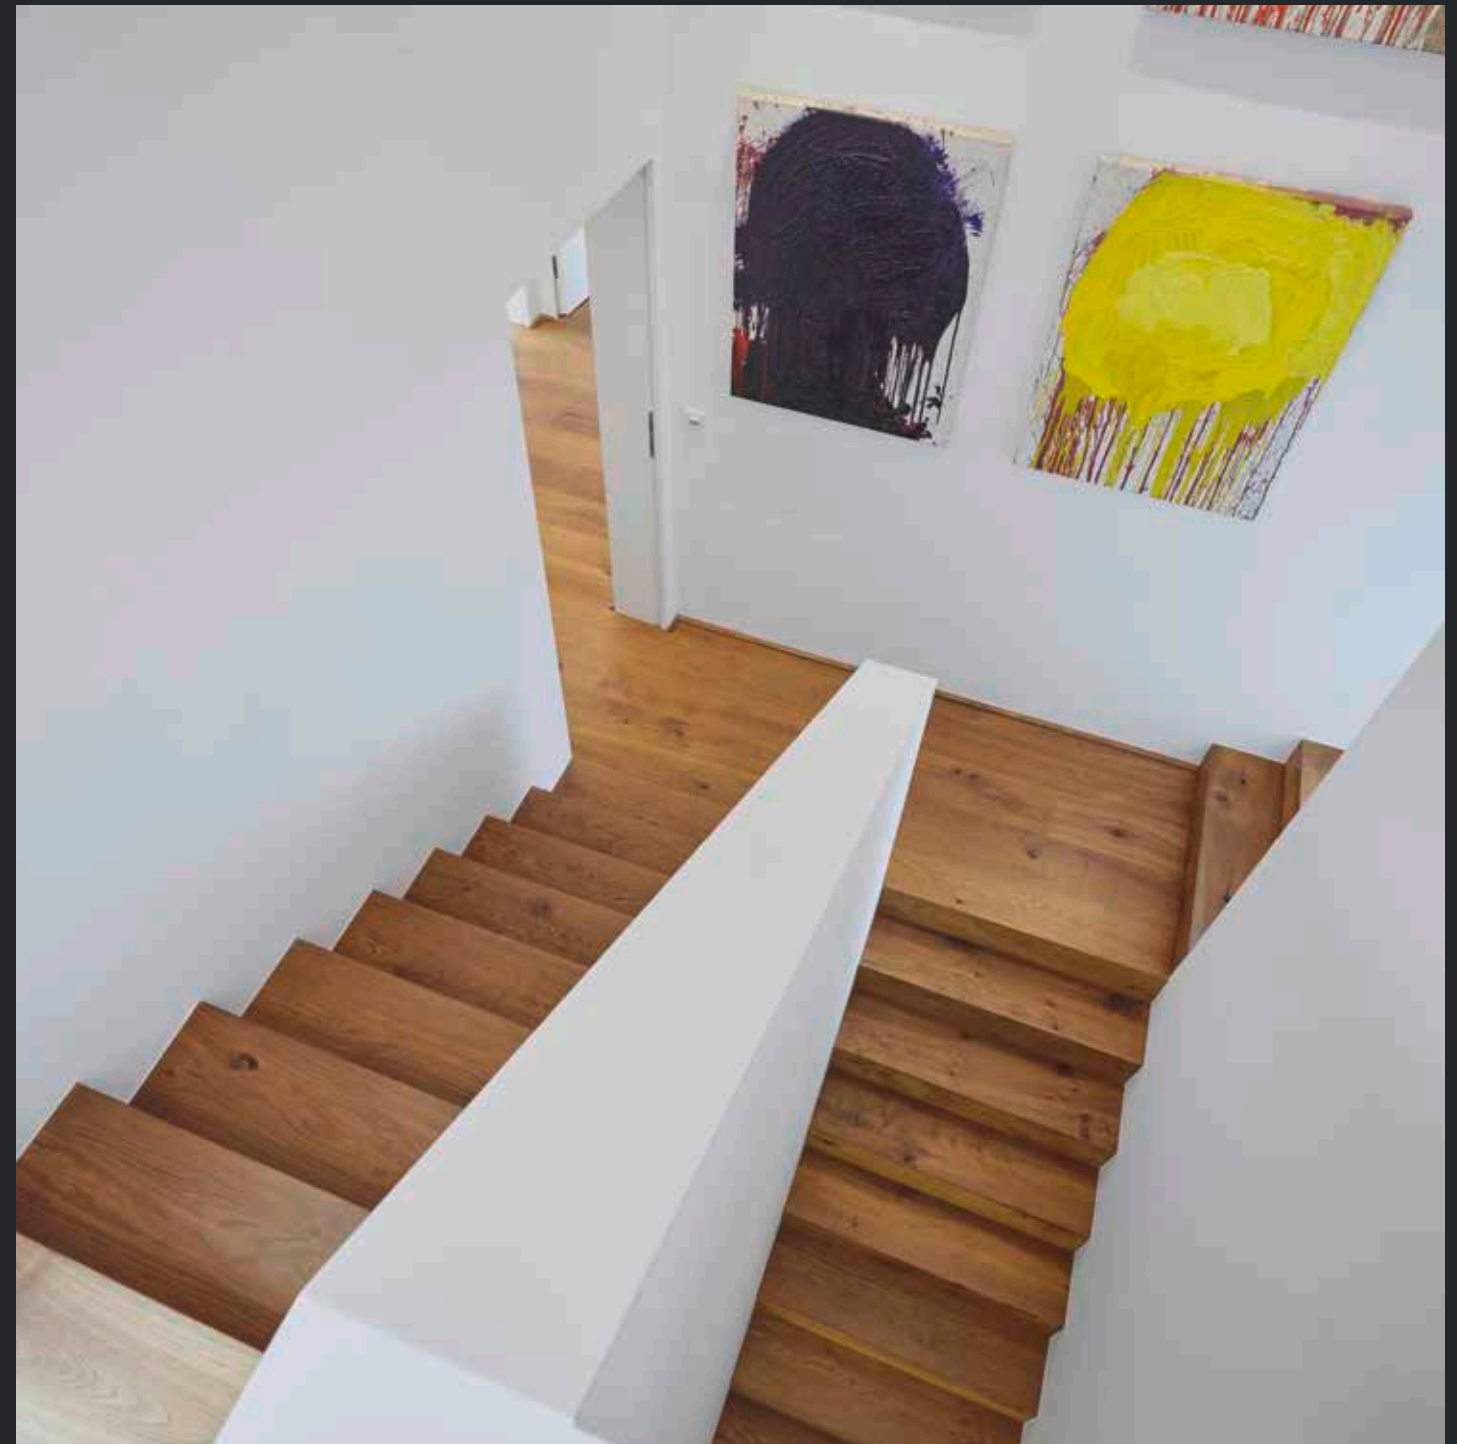

360°

Private, Germany
OAK Country heavily brushed extreme white oil [ECEBXKX]
Architect: Gräbel Architekten Tim Gräbel | Photo: Peters Fotodesign

360° STAIRS

We manufacture custom staircases to match the flooring. The coordinated materials seamlessly integrate the staircase into the overall concept, providing a significantly cozier atmosphere.

Private, Austria
OAK Country Vulcano Medium brushed natural oil [EKVUBKN]
Photo: Mathias Lixl

360° WALL & CEILING

Targeted material repetitions are the key to high-quality furnishing concepts. mafi natural wood planks are also used as accents on walls or ceilings.

The technical requirements are low: the planks are mounted directly to the wall or ceiling with counter battens.

Private, Mexico
OAK Clear brushed white oil [EAEBBKW]
Architect: Federico Gomez Crespo | Photo: Ileana Avila

360° BOISERIE

BOISERIE Linear: The milling penetrates the top layer and reveals the black middle layer as a contrast. An additional longitudinal milling of the gaps with discreet grooves enhances the room-widening effect of the planks. The clear, linear design is ideal for extending room heights and accentuating areas in the interior.

BOISERIE Reserve: Inspired by the Reserve wine label for particularly high-quality wines, this variant offers a restrained look. The discreet milling deepens the top layer without penetrating the middle layer. This creates an interplay between the refined top layer and the second wooden layer with its fine grooves.

360° SKIRTING BOARDS

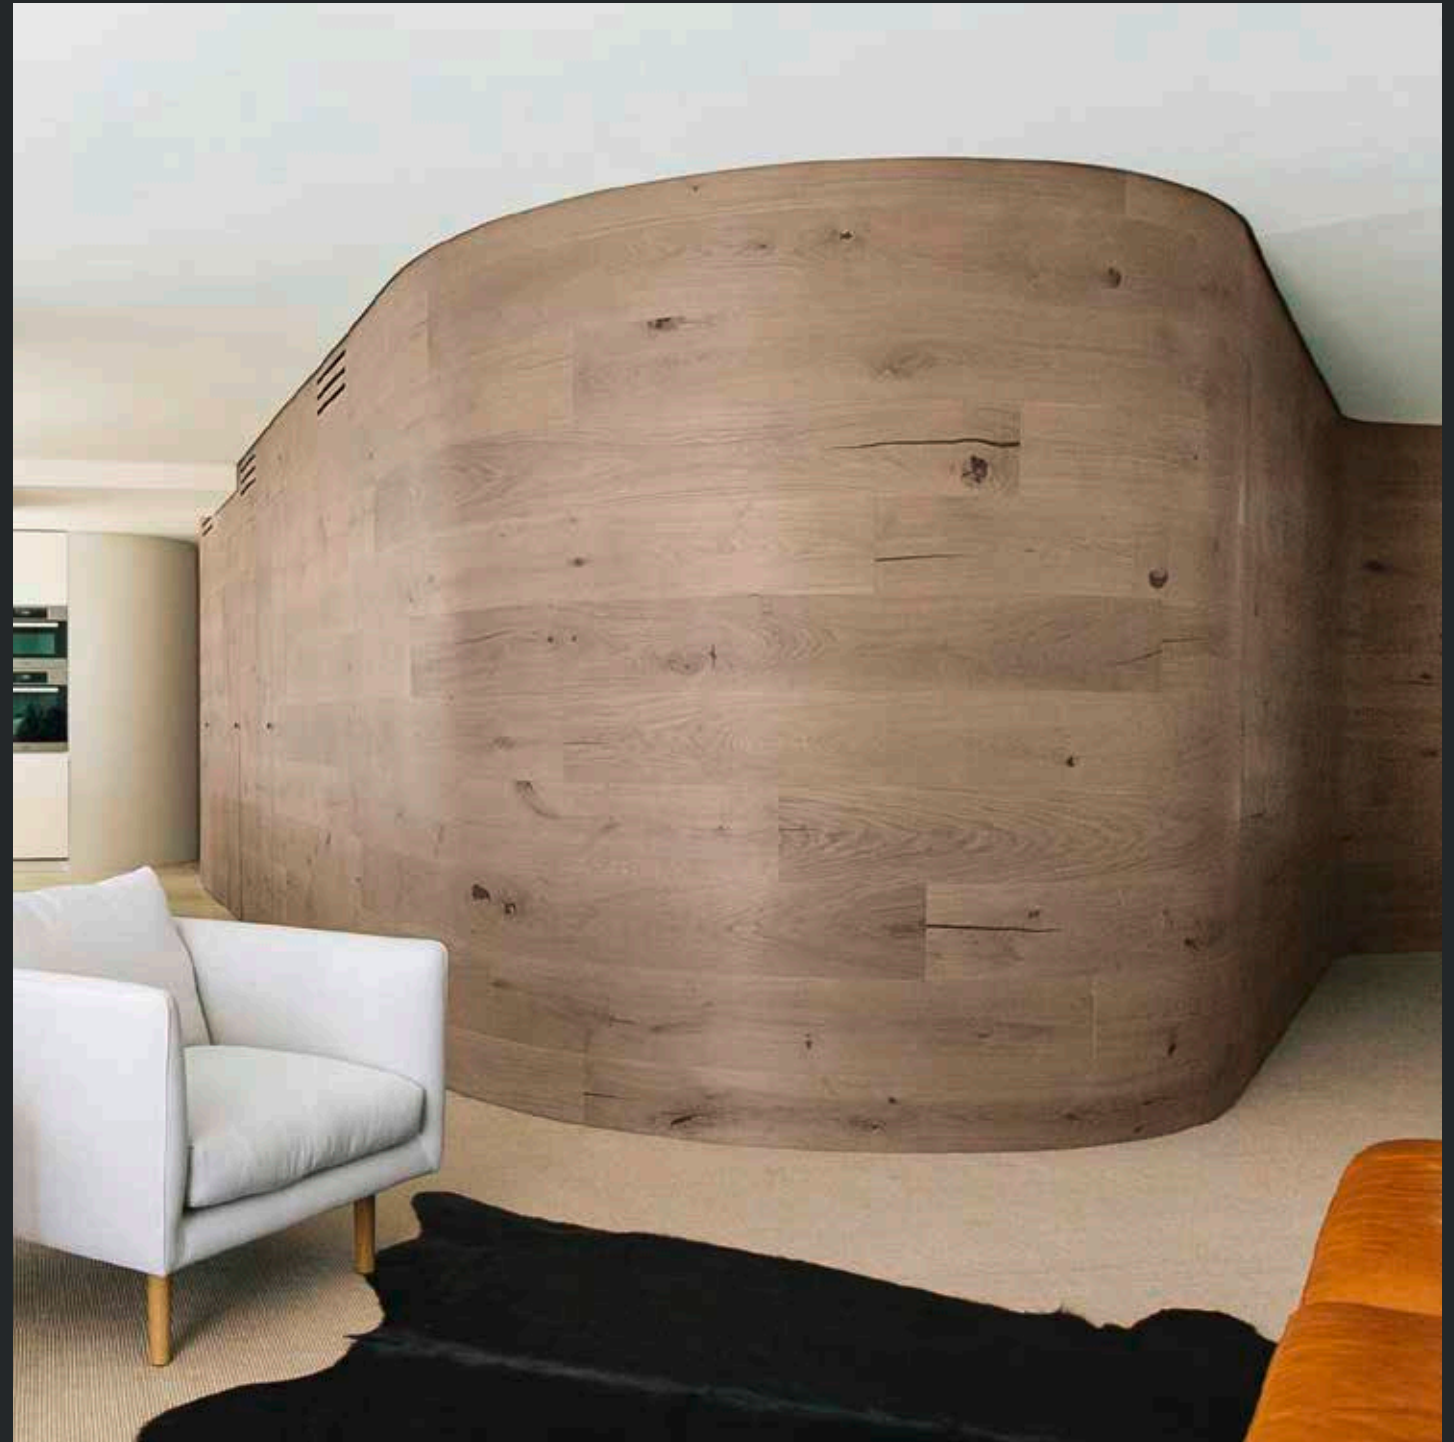

A skirting board is recommended for a clean transition from floor to wall. To ensure a harmonious overall appearance, mafi produces skirting boards directly with the floor order - differences in the color and structure of the wood are thus significantly minimized.

Private, Austria
LARCH brushed white oil [LAEBBKW]
Architect: Studio 2S, Architekten GmbH Stephanie Seidl | Photo: Mathias Lixl

360°
MAFI FLEX

“Back to the original form” is the motto of the mafi Flex planks, a tree trunk is round and so is the mafi Flex plank. Flexible up to a radius of 360°, columns or walls can be clad in a round shape, with a flowing transition between the floor and and, for example, a tabletop.

360° ACCENTS

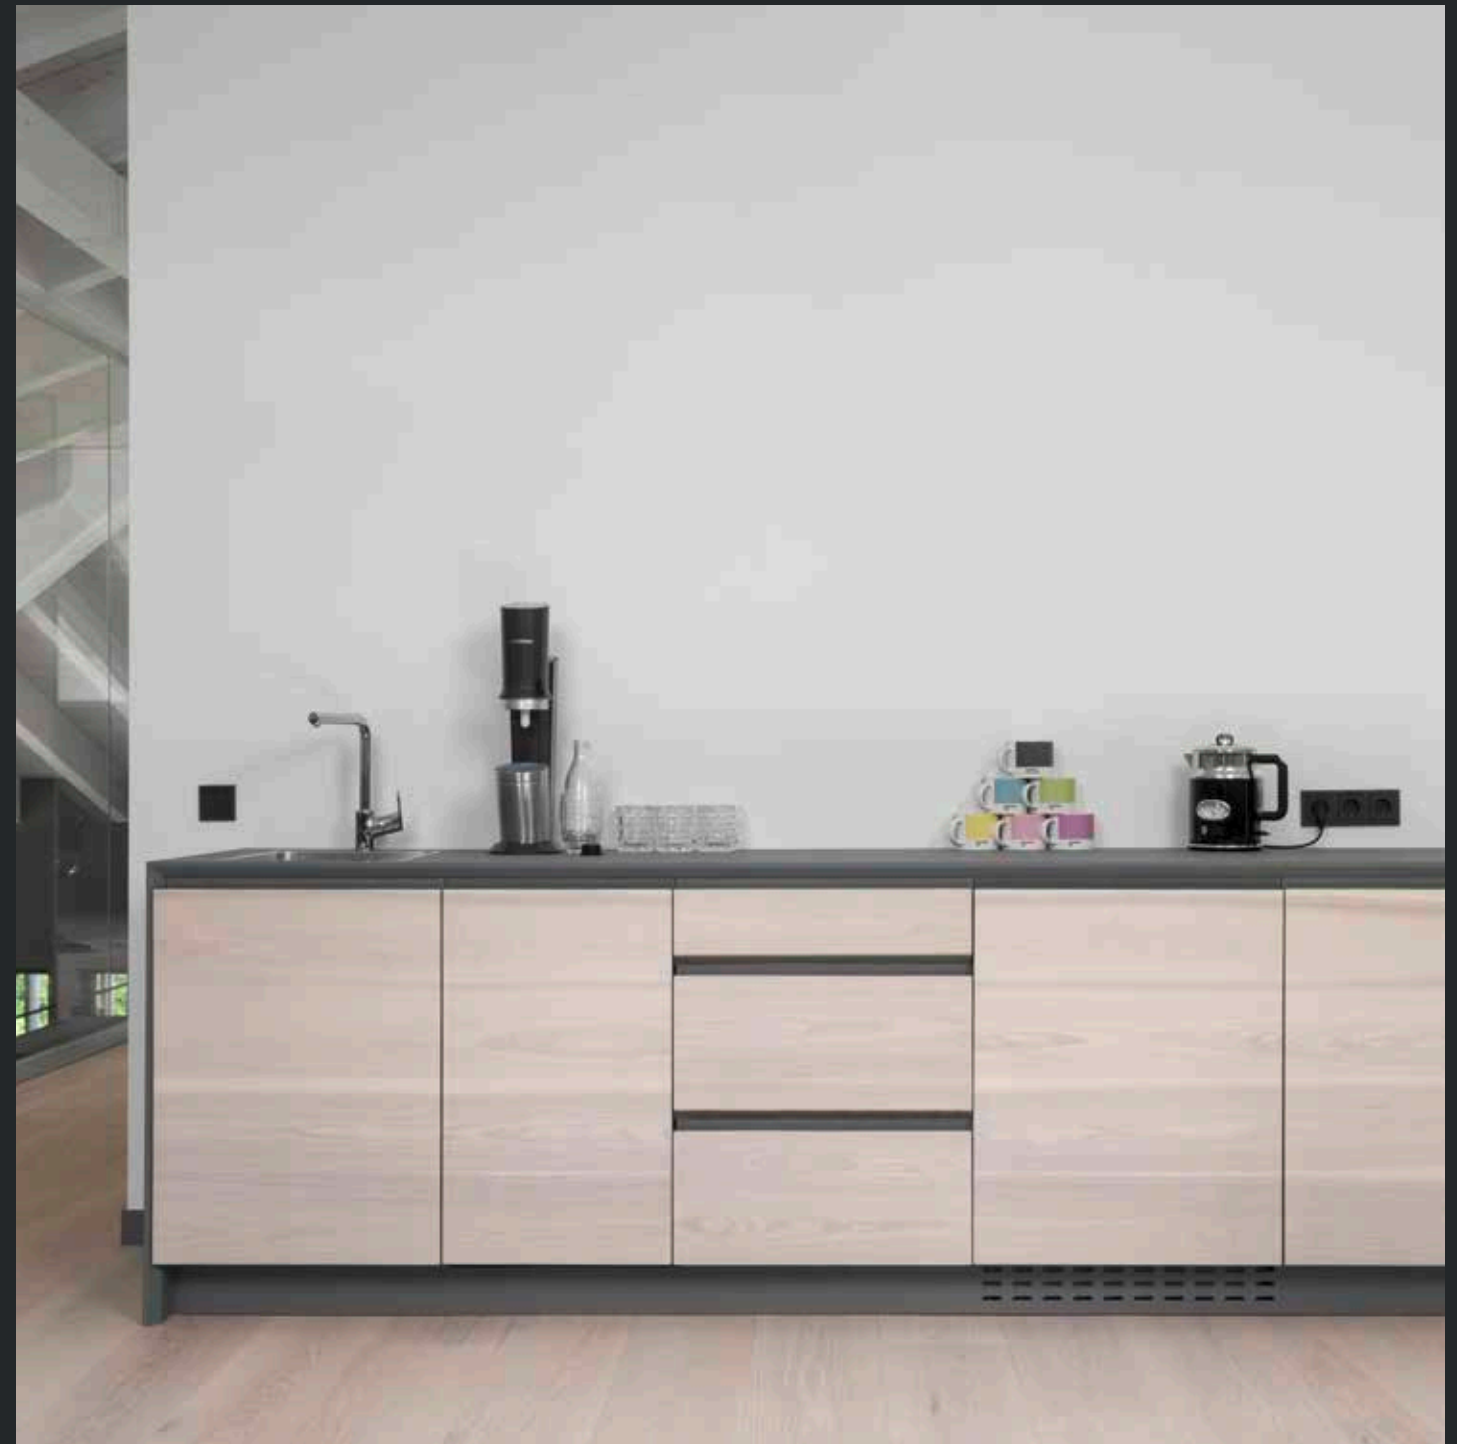

Details make the difference. Targeted material repetitions of the floor, for example as a window sill, ventilation grille or floor socket, create high-quality accents for every project.

Private, Austria
OAK Country Vulcano Medium brushed natural oil [EKVUBKN]
Photo: Mathias Lixl

360° PANELS

Our natural wood floors are also available as panels, either as finished tabletops or for further processing into furniture fronts. We manufacture to size and offer different cutting variants and applications.

MAKING WELLBEING EASY

- A wooden floor creates atmosphere, and above all invites people to stay.
- The open-pored surface paired with soap cleaning, counteracts any build-up of odors.
- Wooden floors have a positive effect on room acoustics.

CLEANING AS EASY AS WASHING YOUR HANDS

- Our natural wood floors have a very resistant surface that can regenerate itself in the event of minor scratches and allows easy repairs.
- Even with intensive use, our floors can be refreshed quickly and without disrupting regular operations.
- The cleaning process is carried out as it was in the early days.

OFFICES OF THE FUTURE

Work Environment

Hyatt Headquarters, USA
OAK Country brushed white oil [ECEBBKW]
Architect: Gensler - San Francisco | Photo: Rafael Gamo

WELL-BEING AT THE WORKPLACE

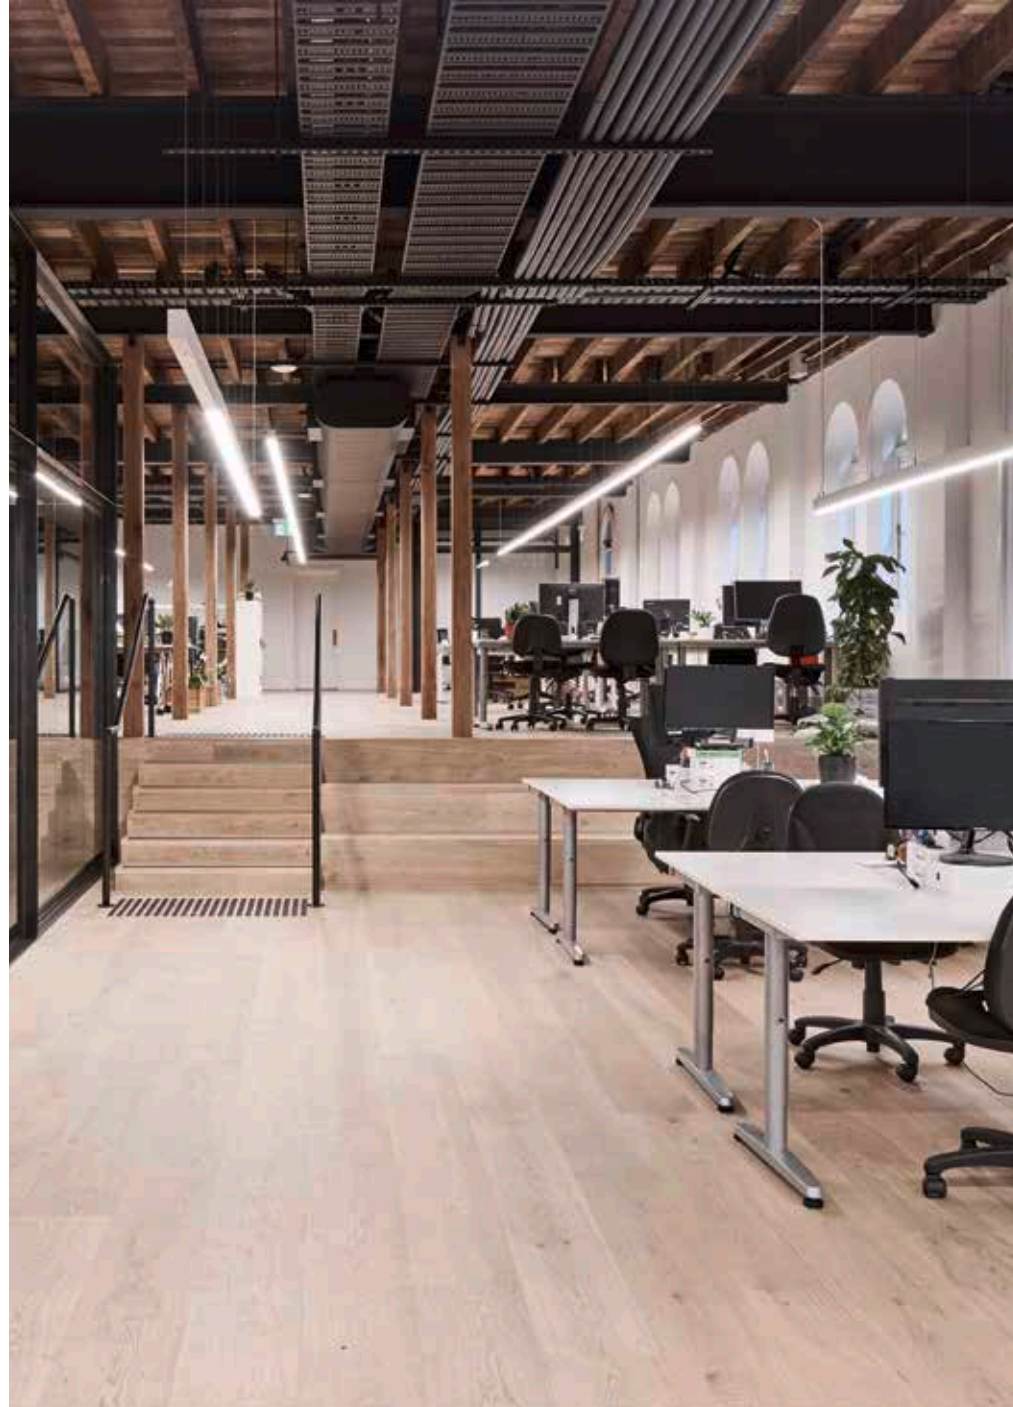

- Real, unadulterated wood in workspaces increases the efficiency of employees through better concentration and reducing the signs of fatigue.
- Our natural wood floors purify the air and have a direct effect on the well-being of employees.
- Our broad portfolio of hardwoods is ideal for more intensive challenges such as rolling office chairs.

WORKPLACE OF THE FUTURE

- Humans and wood harmonize with each other and help create better workplace environments. The key is to preserve the natural properties of the wood.
- A company's ecological footprint plays a significant role and conscientious, sustainable construction and interior design are important calling cards.
- mafi natural wood floors actively remove 8 kg of CO₂ per m² from the environment.

YOUR FLOORING SELECTION CHECKLIST

Countless terms, varied arguments in consultations, and blurred boundaries - whether manufacturers or retailers, do not make it easy to find your way in the wooden floor jungle. The MAFI formula is a tool that lets you ask the right questions and review the most important quality criteria:

MATERIAL

Where does the wood come from? How does the product act over time? How sensitive is the floor and is it easy to repair or does the entire surface always have to be refinished?

FEEL

Color and surface treatment are inextricably linked. Is it just a seal or a high-quality, air-dried oil surface that leaves the wood natural? Touch the surface and feel the difference between plastic and wood!

A BALANCED STRUCTURE

Ask about the thickness of the top layer, the symmetry of the back layer, and the adhesives used. Is the floor suitable for underfloor heating?

INGREDIENTS

Which substances and agents were used in the manufacturing process? How does the product behave in terms of indoor climate and healthy living?

GERMAN DESIGN AWARD

The German Design Award recognizes innovative products and projects, their manufacturers and designers, and sheds light on unique design trends. In 2017, mafi was awarded the German Design Award Special for the LARCH Domino Vulcano.

reddot design award
winner 2012

RED DOT DESIGN AWARD

“Red Dot” has established itself internationally as one of the most coveted seals of quality for outstanding design. mafi participated in the competition in 2009 and 2012 and received an honorable mention for product design 2009 and won the Product Design Interior category in 2012.

ENERGY GLOBE AWARD

The Energy Globe Award is the world’s most prestigious environmental prize. It annually honors outstanding, sustainable projects with focusing on resource conservation, energy efficiency and the use of renewable energies. mafi won the 2011 award in the earth category.

ILFI – INTERNATIONAL LIVING FUTURE INSTITUTE

The International Living Future Institute is a non-profit organization with the world’s strictest standards for the construction industry. Its mission is to transform humanity so that it gives more to our environment than it takes. mafi had been sponsoring the ILFI since 2019.

LIVING PRODUCT CHALLENGE

LPC is a program for manufacturers to create products that are natural, inspiring, which give more back to the environment than they take away from it. LPC is the strictest certification program on the planet. mafi is the first wood floor manufacturer in the world to have successfully completed the certification.

MINDFUL MATERIALS

mindful Materials is an online material library where manufacturers can present their products and certificates. The platform specializes in the sustainability market in the construction industry. mafi has put 37 products online on the platform for architects, designers, and sustainability managers to discover.

EPD – ENVIRONMENTAL PRODUCT DECLARATION

EPD is an environmental product declaration for manufacturers and shows the sustainable life cycle for the entire production of a material or individual product. mafi has carried out a complete life cycle analysis of its production line. The entire mafi portfolio, and not just a specific product line, was shown as being net carbon-negative. This is because we bind more CO₂ than we emit.

HPD – HEALTH PRODUCT DECLARATION

HPD is an international health product declaration that tests the ingredients of a product and its toxicity. mafi’s HPD certificate confirms the harmlessness of our entire product line.

USGBC – UNITED STATES GREEN BUILDING COUNCIL

The mission of the United States Green Building Council (USGBC) is to change the way buildings are planned, built, and operated and to leave behind an ecologically and socially responsible healthy environment that improves the quality of life for us humans. mafi is a USGBC partner and provides valuable points for building certification.

DECLARE

The Declare label is like the nutritional and ingredient labels seen on food products and tells consumers where the material comes from, where it is produced, and where it can end up at the end of its life cycle. mafi uses the “Declare 2.0 100 % Red List Free – verified by third parties” label.

RED LIST FREE

The Red List was launched by the International Living Future Institute (ILFI) and lists materials, chemicals, and elements used in the construction industry and products that are hazardous to human health and the environment. mafi natural wood floors do not contain any of these substances and are therefore 100 % Red List Free.

SENSITIVE CHOICE – NATIONAL AUSTRALIAN ASTHMA INSTITUTE

As a non-profit organization, the National Asthma Institute helps some 300 million allergy and asthma sufferers around the world find the right products that can make their lives easier. mafi was the first wood floor manufacturer to complete the certification program successfully. (Expired).

FSC® – FOREST STEWARDSHIP COUNCIL®

As a pioneer of sustainability certification in forests, FSC® has made a name for itself promoting and monitoring sustainability practices in forestry. mafi only uses sustainable wood and also offers FSC® certification – FSC C017086.

RESOURCES SAVED

Interseroh – one of the leading providers of sustainable system services to close all aspects of product, material, and logistics cycles has awarded mafi the “resources SAVED 2013” certificate. The calculations show that 24,037 kilograms of resources were saved in 2013.

MAS CERTIFIED GREEN

MAS is an emissions test laboratory specializing in helping companies to manufacture products for a green future with ecological building products. mafi natural wood floors were certified with the MAS Certified Green Label in 2018. mafi is one of the few wood flooring manufacturers in the world to have received this certification.

YOUR CONTRIBUTION TO A BETTER WORLD

mafi natural wood floors remove 8kg of CO₂ from the environment per square meter produced. This makes them an important contribution to a safe and healthy future.

INSPIRATION

... may have been the first step, but the result is always an expression of personality and creativity.

With our projects from all over the world and in a various applications, we try to set trends and point new ways forward. mafi natural wood floors form the basis for rooms and a wide variety of interior design concepts. Architects, designers, sales partners, and builders use it to create entirely individual projects that also become a source of inspiration for others and thus mark a new, first step.

We draw our inspiration from nature and the natural texture of wood. In addition to the design, it is above all the technology used in our production that reflects this approach, because we give it the time needed and don't sacrifice naturalness for speed. This is why our wood dries in the open air, our white glue binds a little more slowly, but is free of pollutants, and our oil is absorbed deeply into the wood instead of drying quickly on the surface.

Our inspiration is also found in the dialog and cooperation with the people who surround us. On the one hand, these are our colleagues, suppliers, and business partners in the region who have a deep connection and history with natural and sustainable wood processing. mafi is located in the heart of Europe on the edge of the Kobernauss Forest, which, together with the Hausruck Forest, forms one of the largest contiguous forest areas in Central Europe. Our two factories are just 12 km apart and both take wood logs and turn them into planks 100 % made in Austria.

Secondly, we draw our inspiration from our diverse international contacts with architects, designers and wood flooring experts. Be it the highest craftsmanship from Europe, the courage to use color from Mexico, the timeless restraint of Scandinavia, the modern simplicity of Asia or uncompromisingly sustainable project requirements from the USA - inspiration lurks in every encounter.

Let us inspire you today!
