MAFI 360°
DETAILS THAT MATTER

Details have a subtle but lasting influence on the overall design. The mafi 360° program creates coordinated and matching overall solutions for the perfect natural wood floor.

Sustainability meets skillful accentuation, design meets healthy living. Depending on the type of application, different parts of the tree can be used for different products, making optimum useage of wood as a resource. The purposful use of our natural wood creates a warm atmosphere and integrates details, such as window sills, into the overall concept.

Natural Wood Floors

A wooden floor in different formats. Whether herringbone, parquetry panel or room-length planks, we offer both modern and classic formats. mafi planks are finished with natural linseed-based oil. We uncompromisingly avoid the use of unnatural substances. The typical mafi symmetrical 3-layer structure also provides the necessary stability.

- 9 native wood species
- various formats and installation patterns
- possibility to create unique designs
- suitable for residential and commercial use

and inspiring projects

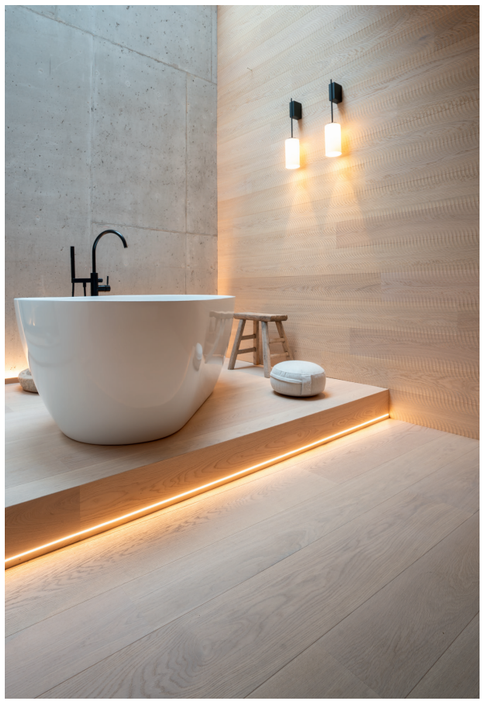

Wall

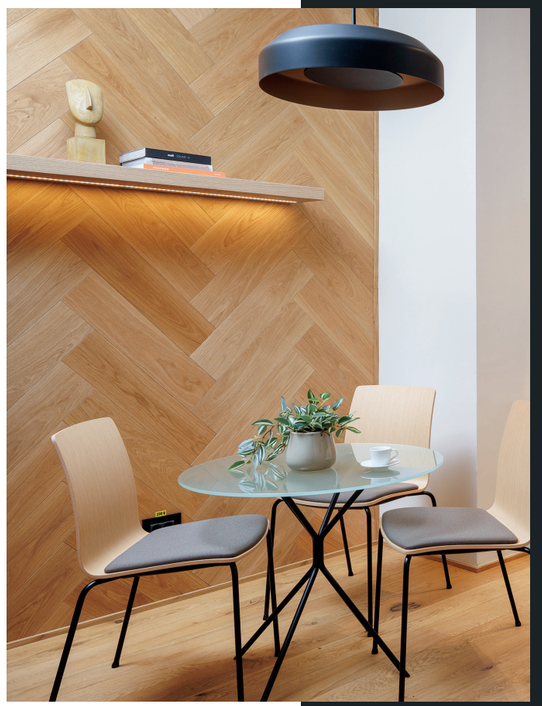

Wooden wall cladding automatically creates atmosphere and separates areas. Simply mounted on counter battens, the entire mafi portfolio can also be applied to the wall. In addition to the planks, special variants are particularly popular:

- Installation patterns such as herringbone, chevron or hexagon
- Design and 3D surfaces
- Boiserie Linear and Reserve
- mafi Flex for curved walls and columns

Further information
to solutions for the wall

Ceiling

The ceiling as a reflection of the floor – the resulting cocoon effect is soothing, especially in large spaces and as a specific highlight to accentuate an area. Ceiling cladding also allows for expanded installation possibilities and lighting solutions. Particularly exciting:

– Natural, acoustic effect of wood
– mafi Flex as a flexible plank

Stairs

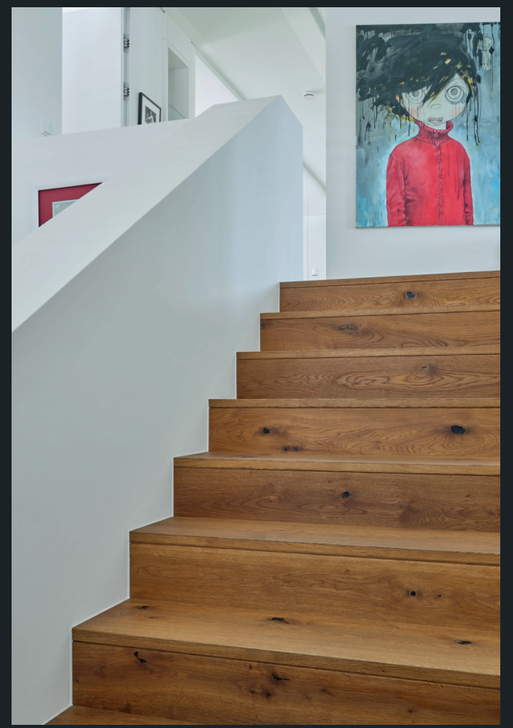

The staircase in the living area has become an integral part of the interior and has long outgrown its existence as a necessary commodity. They blend in perfectly with the floor or can be staged as a visual contrast.

mafi staircases are made to measure and are available in the following versions:

- Steps
- Steps and risers with optional shadow gap
- Stair nosings for covering stairs with floorboards
- Stairs of reduced thickness for refurbishments and renovations

SKIRTING BOARD

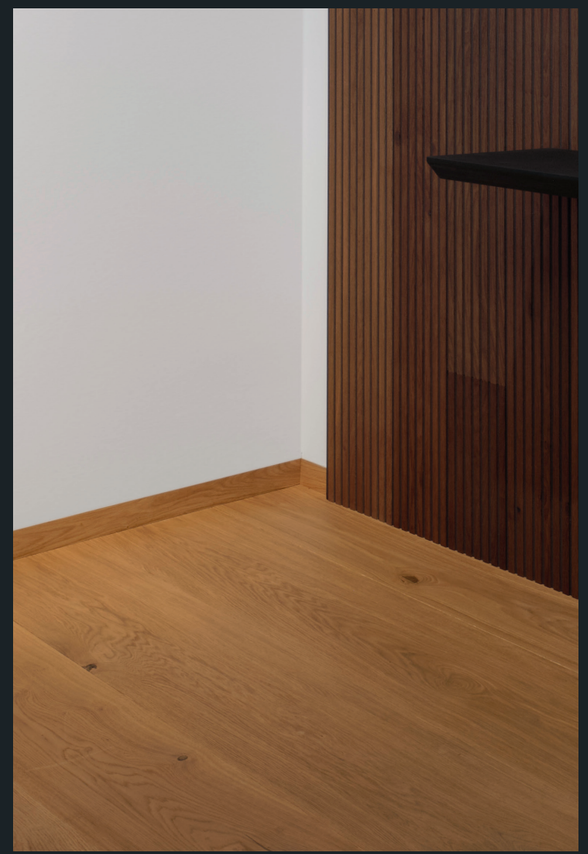

Skirting Board

Simple elegance with high functionality – our skirting boards are made directly from planks and therefore perfectly match the respective natural wood flooring. Available in different heights and designs, they are suitable for any interior design style and have practical advantages:

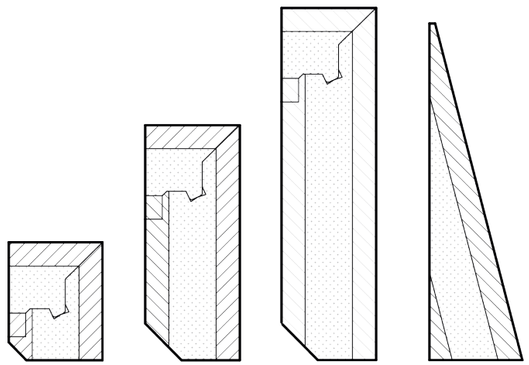

- The skirting boards protect the wall during wet cleaning
- The necessary expansion joints to the wall are elegantly concealed
- Our Profile L is a simple, smart solution with the look of a flush-to-wall skirting board

Table & Panel

We take material integration one step further with our LEVEL table collection and our range of worktops for further processing.

With the LEVEL Joy and LEVEL Work natural wood tables, we have a dining table and a desk version in our range where the table top can be made to match the floor. The frame and shape can be freely configured.

We also offer tops for further processing. The natural wood panels can be ordered to match the floor. Additionally they can be used as solutions for furniture, store fitting and custom-made products for craft businesses – special requests are very welcome.

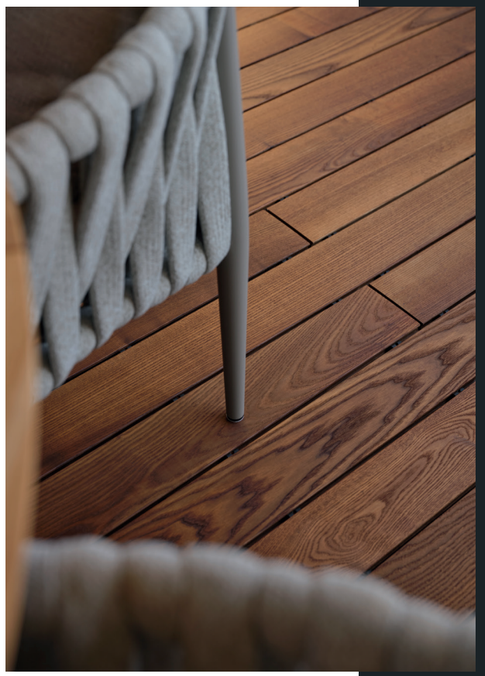

- Suitable overall solutions made of natural wood
- Symmetrical structure for improved warping resistance
- Sourced directly from the manufacturer
- Available from batch size one

on formats and surfaces

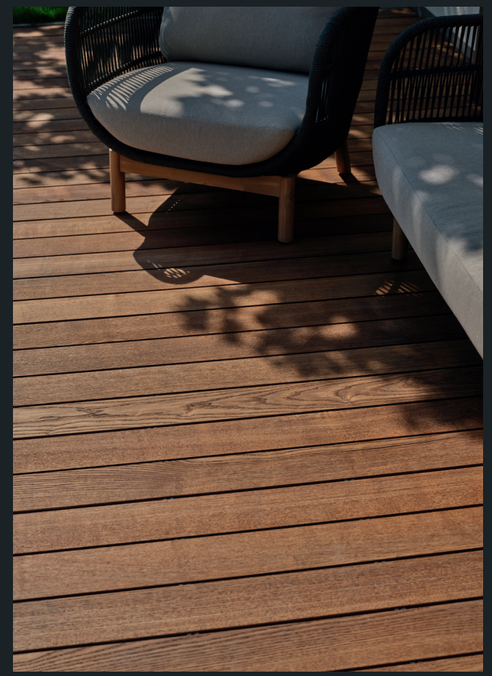

Terrace

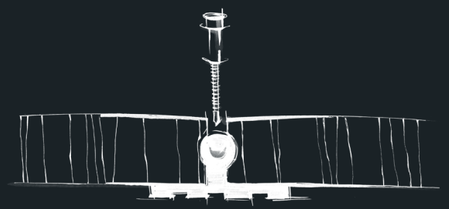

With our decking boards, we literally cross the boundary between indoor and outdoor areas. Our thermally optimized ash is ideal for high-quality wooden decking and offers important advantages:

- Invisible screw connection
- No damage to the wood
- individual replacement of planks always possible
- Increased weather protection due to slightly rounded surface (convex)

Further information
to dimensions & installation

Pellets

Not part of the interior design but an important part of our sustainable production cycle: our pellets are made from our production offcuts and waste and material purchases from Austria.
This responsible approach makes the following possible:

- Holistic use of the tree
- regional delivery of loose pellets
- International shipment of bagged goods

STABLE . NATURAL . HEALTHY

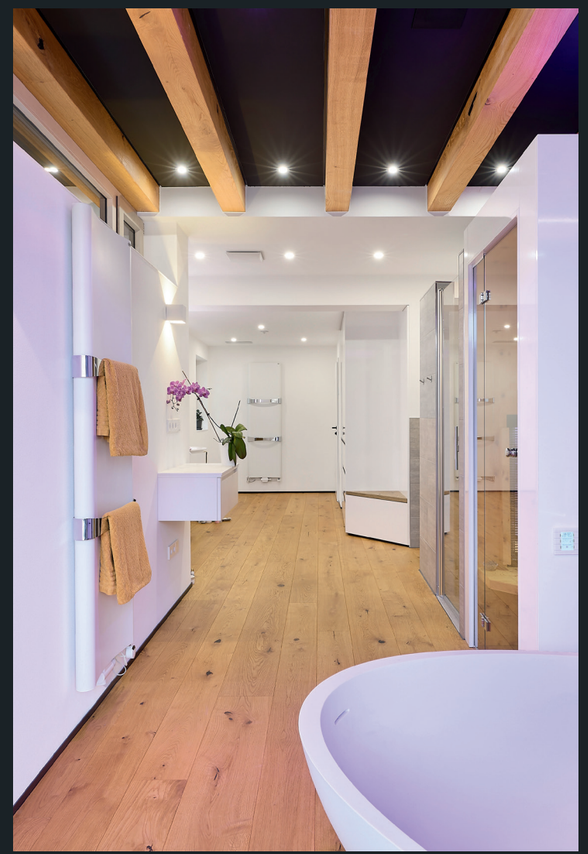

Our Values

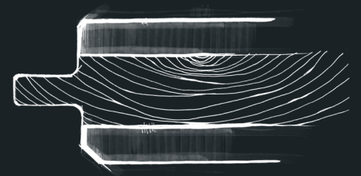

The value of a wooden floor only becomes apparent over time. Then details that are hidden behind the appearance play a role. For mafi, stability, naturalness and health are core values that characterize the company, product and philosophy.

Stable

The floor forms the foundation for every room. Its quality determines its resistance, appearance and consistency. That is why mafi natural wood floors stand for stability, whether as a product, a family business from Austria or a long-term guarantee of quality.

FACTS

- Top layer and back layer made of the same wood with the same thermal treatment
- Middle layer made of softwood 90° cross-glued
- Glued with formaldehyde-free white glue

ADVANTAGES

- Very high stability and greatly reduced gap risk
- Ideal for installation on underfloor heating systems
- Wide range of applications
- Impressive dimensions of up to five meters length and 300 millimeters width possible
- Optimum utilization of resources

to our plank structure

Natural

Wood in its unadulterated form interacts with all human senses. Only in this way the natural material can unfold its healthy and beneficial properties for us humans. mafi natural wood floors are not just limited to their appearance, but make the floor tangible as a whole.

FACTS

- Natural oils dried in the air
- no layer-forming surface
- open-pored surface

ADVANTAGES

- Direct contact with wood & therefore always warm to the body
- Completely ecological and formaldehyde-free
- Extremely long product life cycle
- Spot repairs possible
- Very broad color spectrum of natural colors
- Room climate regulating properties

HEALTHY

Healthy

Headaches, burning eyes, allergies... we spend over 90 % of the day indoors. This makes it all the more important to pay attention to the origin and ingredients of the materials used in the rooms.

mafi natural wood floors consist of wood, pollutant-free glue and natural oils. In addition, our natural wood floors permanently improve the indoor climate.

FACTS

- Finishing with natural oils
- Bonding of the three solid wood layers with white glue
- Time as a quality criteria

ADVANTAGES

- Improvement and filtering of indoor air
- formaldehyde-free
- no VOCs
- ideal for allergy sufferers and asthmatics
- optimum hygiene

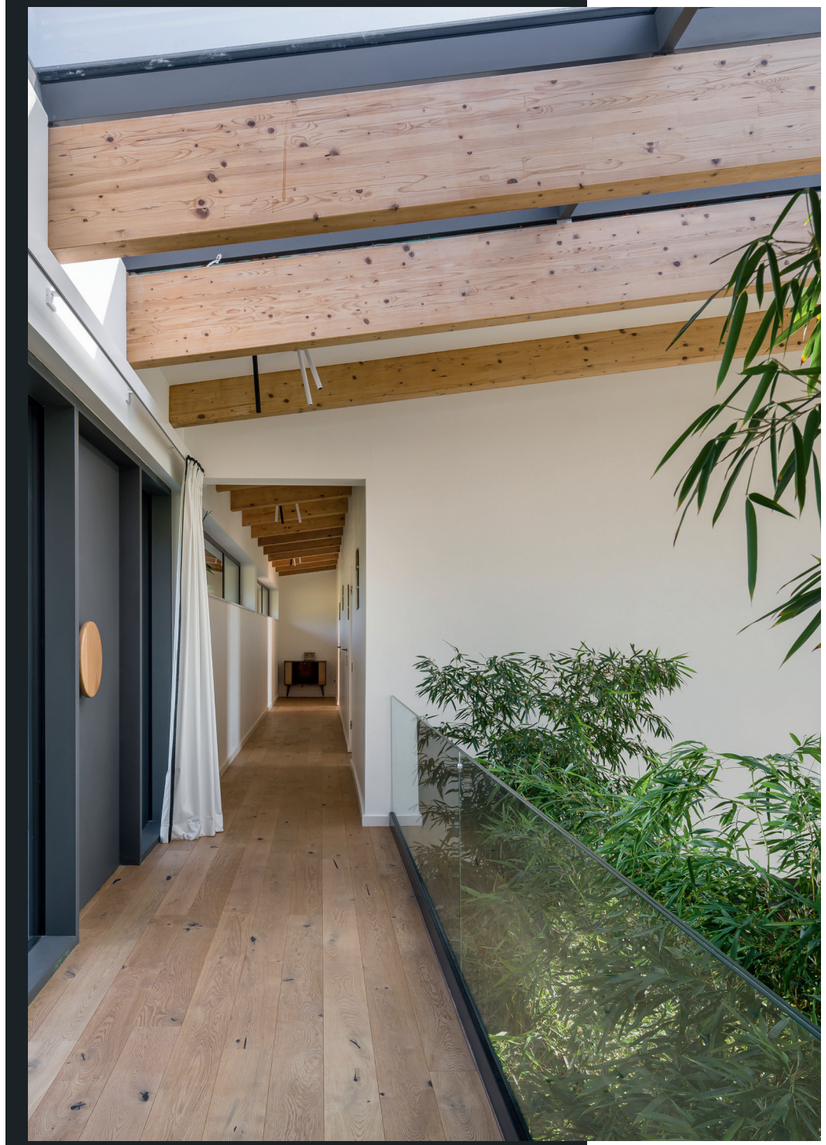

Further information
to healthy living materials

Living with real Wood

People have an inner need for contact with nature. This contrasts with the ever-increasing amount of time we spend indoors. The consequences?

Stress, exhaustion and imbalance, both at home and at work. Future-oriented interior design therefore places the restoration of well-being and health at the center of its concepts. The selection of healthy and natural materials is central to this.

Wood in its natural, unadulterated form is the material of choice and improves the interior in all areas.

- Increased ability to concentrate
- Improved air quality
- Antibacterial and antiseptic effect
- Increased well-being
- Reduces electrosmog
- Ideal for allergy sufferers and asthmatics
